

SAMPLE EVALUATION CRITERIA

In making recommendations, the Commission would consider the extent to which a proposed option:

1. Promises, in a significant and measurable way, to move the health care system in Washington to where we believe it should be in five years by addressing one or more of the principles identified in our vision statement;
2. Reflects active collaboration, in both its design and implementation, among various stakeholders in the health care system;
3. Is feasible;
4. Is sustainable;
5. Is affordable;
6. Serves as a bridge to future opportunities;
7. Builds the capacity of health care organizations in the state to continue to address deficiencies in the health care system on a long-term basis;
8. Addresses long-term core issues rather than episodic or time-limited issues;
9. Is creative and innovative in both what is done and how it is accomplished, building on existing policies and programs, rather than simply duplicating them.
